

Nous Infosystems Announces Strategic Partnership with Nastel Technologies

Bangalore, India – February 02, 2012:

Nous Infosystems, a global Information Technology Company, providing quality software solutions across a broad spectrum of industries and domains, announced a strategic partnership with Nastel Technologies, a premier global provider of business transaction performance(TM) solutions for mission-critical applications spanning both the distributed and mainframe tiers. Nous Infosystems will leverage Nastel's state-of-the-art application performance management solutions to improve upon its application performance management services, thus enabling them to offer greater value to their clients.

Nastel AutoPilot provides businesses with 360° situational awareness™ of both operational and transactional data delivering improved visibility, prediction and performance. Nastel's business transaction management solution ensures optimum service levels while eliminating the hidden costs, or "stealth waste," in business processes. AutoPilot's capabilities for transaction management, deep expertise in WebSphere MQ, automated root cause isolation, performance analysis and determination of business impact enable its users to improve business process efficiencies and service levels while reducing cost and managing risk. Global 2000-sized companies, including many of the world's largest banks, financial institutions, retail chains, transportation, manufacturing and insurance companies, as well as government agencies, rely on Nastel 's AutoPilot to ensure smooth, uninterrupted business operations.

"Nous Infosystems is proud to partner with Nastel, whose AutoPilot solution offers 360-degree situational awareness delivering applications and business transaction performance management across multiple distributed networks. Coupling Nous's extensive infrastructure management services and domain expertise with Nastel's solutions will ensure that our clients receive comprehensive and best-in-class application monitoring and management services" said Mr. Ajith Pillai, President & CEO, Nous Infosystems.
